

# Pupil premium:-What difference did it make?

## In the academic year 2016/17

Children have 15 hours provision at nursery school a week. ***In the Summer of 2017 we had 18 children who were eligible in total in the school, however this has fluctuated over the year.***

Baseline entry data show that children enter well below national expectations as we benchmark against an average child entering the term after they are 3 at emerging 30-50m. For a child to make expected progress across the Primary school they will need to enter Reception class at emerging 40-60months.

As children can now enter the nursery the day after they are 3 years old we would benchmark against these children as entering at exceeding 22-36months.

As some children can now enter the nursery the term after they are 2 years old we would benchmark these children against emerging 22-36months.

As a school we are trying to narrow the gap between national expectations on entry and exit as they go to the Primary school.

*The data below may not track the same children every term as some enter at different times of the year, have left or have been identified as pupil premium part way through the year. However it is a broad indication of progress being made.*

## Data below shows the impact that the pupil premium money made on progress.

*Key:-The data show the age range children entered on in months in the different areas of learning and their progress each term.*

*e.g 22-36m means 22-36 months*

*EM-emerging, EP-expected, EC-exceeding*
