

Pupil premium:-What difference did it make?

In the academic year 2019/20

Data shown is up to Easter 20 due to COVID-19

Children have 15 hours provision at nursery school a week. We have 18 full time children (by the Summer term. This has fluctuated throughout the year) as these parents are eligible for the full time funding.

In the Summer of academic year 2019/20 we had 27 children who were eligible for pupil premium in total in the school, however this has fluctuated over the year.

Baseline entry data shows that children enter well below national expectations as we bench mark against an average child entering the term after they are 3 at emerging 30-50m. For a child to make expected progress across the Primary school they will need to enter Reception class at emerging 40-60months.

As children can now enter the nursery the day after they are 3 years old we would benchmark against these children as entering at exceeding 22-36months.

As some children can now enter the nursery the term after they are 2 years old we would benchmark these children against emerging 22-36months.

As a school we are trying to narrow the gap between national expectations on entry and exit as they go to the Primary school.

The data below may not track the same children every term as some enter at different times of the year, have left or have been identified as pupil premium part way through the year, or have been taken off the pupil premium category. However, it is a broad indication of progress being made.

Children in nursery make really accelerated progress in the summer term before they leave, which can be seen if you look at other years' data. Unfortunately, this year we do not have this. Staff were really disappointed that we were not able to educate our children as normal as we had high hopes of the 3&4 leavers for 2019/20

Data below shows the impact that the pupil premium money made on progress to Easter 20.

Key:-The data show the age range children entered on in months in the different areas of learning and their progress each term.

e.g 22-36m means 22-36 months

EM-emerging, EP-expected, EC-exceeding
