

Pupil premium:-What difference did it make?

In the academic year 2018/19

Children have 15 hours provision at nursery school a week. We have 18 full time children (by the Summer term. This has fluctuated throughout the year) as these parents are eligible for the full time funding.

In the Summer of 2018/19 we had 16 children who were eligible in total in the school, however this has fluctuated over the year.

Baseline entry data shows that children enter well below national expectations as we benchmark against an average child entering the term after they are 3 at emerging 30-50m. For a child to make expected progress across the Primary school they will need to enter Reception class at emerging 40-60months.

As children can now enter the nursery the day after they are 3 years old we would benchmark against these children as entering at exceeding 22-36months.

As some children can now enter the nursery the term after they are 2 years old we would benchmark these children against emerging 22-36months.

As a school we are trying to narrow the gap between national expectations on entry and exit as they go to the Primary school.

The data below may not track the same children every term as some enter at different times of the year, have left or have been identified as pupil premium part way through the year, or have been taken off the pupil premium category. However, it is a broad indication of progress being made.

Data below shows the impact that the pupil premium money made on progress.

Key:-The data show the age range children entered on in months in the different areas of learning and their progress each term.

e.g 22-36m means 22-36 months

EM-emerging, EP-expected, EC-exceeding

Children who started as a 2 year old in September 2017

These children will go to other schools in Sept 2019- reception classes
